IsoVac Engineering is the only world source that is actively engaged 'full-time', in the field of Krypton-85 tracer-gas leak detection equipment manufacture and support. To assist those companies that have this type of equipment, IsoVac is providing "Safety Notices" on subjects that relate to the use and disposal of these machines.

IsoVac Report Number R - 4111

Krypton-85 Leak Detection Systems "Training", Service/Maintenance" and Decommissioning"
